0.1 Date_added null values

We will fill the null values in date_added by the recent date as Netflix has maximum content after 2021 and it keeps adding content.

```
[106]: recent_date = df['date_added'].max()
```

```
[107]: recent_date
```

```
[107]: Timestamp('2021-09-25 00:00:00')
```

```
[108]: df.fillna({'date_added' : recent_date}, inplace = True)
```

```

<ipython-input-108-2e0d0b5c1e01>:1: DeprecationWarning: In a future version,
`df.iloc[:, i] = newvals` will attempt to set the values inplace instead of
always setting a new array. To retain the old behavior, use either
`df[df.columns[i]] = newvals` or, if columns are non-unique, `df.isetitem(i,
newvals)`

```

```
df.fillna({'date_added' : recent_date}, inplace = True)
```

```
[109]: df[df.show_id == 's8183'] # Here NaT is changed by the recent date
```

4 Insights

- Netflix has more movies than TV Shows
- USA has the largest content on netflix followed by India, UK, Japan and South Korea.
- Overall USA has the most contents whether in movies or TV Show.
- Apart from USA in terms of movies India is second largest contributor followed by UK, Canada, Spain.
- In case of TV Shows UK is the second largest contributor followed by Japan, South Korea.
- We observe that India, Spain like countries produces more movies whereas countries like Japan and South Korea mostly produces TV Shows
- From the bar graph (Popular Ratings) we observed that netflix has more contents for mature adults or we can say that netflix has more adult population as their major consumers of their contents.
- From the kde plot in 'Yearwise Analysis' we observe that plot is more skewed between 2000 and 2025 which indicates that majority of the contents have their release year after 2000 or more precisely after 2010.
- Netflix's contents increased exponentially after the year 2015 indicating increase in consumption.
- 2018 was the best year in terms contents added on Netflix and after that contents are added almost similar to this year.
- TV Shows content showed great increase after 2017 and 'Yearwise Content Trend' shows us that TV shows are added more on Netflix compared to the movies.
- Dramas, International Movies, Documentaries, Stand-Up Comedy, Comedies, Dramas, International Movies, Dramas, Independent Movies, International Movies, Kids' TV etc these are the popular genres on Netflix

- From ‘Typewise-Yearwise Density Plot’ we observed that rate of producing TV shows is higher than the TV Shows

5 Recommendations

- We can add more contents from countries like Brazil, Spain, France, Australia and many more to bring more varieties of contents for the consumers
- India can prove to be a potential candidate for bringing content, we can add much more TV Shows produced in India.
- India can balance USA in terms of movies contents so more movies from India should be added.
- Japan and South Korea mostly produces TV shows but we can also add movie content from these countries along with more TV Shows,
- From ‘Popular Rating’ graph we can see that mature contents are more consumed so we can also add more of these ‘MA’ rating shows.
- Since consumers like modern contents as we observed from the graph so contents after 2010 should be given priority.
- Contents of genre stand up comedy, drama documentaries, kids tv, action and adventure should be added on frequent basis as they are the popular genres on Netflix.
- More TV Shows should be added as they are getting more popular on Netflix
